Professional Summary

- Professionally certified Python programming, currently working as Python Developer at Algoptions Technologies Pvt. Ltd. Indore, MP.
- 4+ years of experience in building High-performance Trading and Automation Systems.
- Hands-on experience integrating multiple APIs like Zerodha-Kite, Dhan, Symphony, Jainam, Angelone, and Kotak-Neo.
- Experience deploying scalable applications on Amazon Web Services (AWS).
- Skilled in web scraping using BeautifulSoup and Selenium.
- Basic knowledge of HTML5, CSS3, and Bootstrap.
- Proficient in using Django Admin Site and interacting with databases (MySQL, PostgreSQL).
- Adept at working with operating systems like Windows 7, Windows 10, Linux (Ubuntu), and tools such as MS Office (Excel, Word, PowerPoint).
- Strong communication skills and attention to detail.

Professional Experience:

Algoptions Technologies Pvt. Ltd. - Indore, MP
Python Developer

Apr 2023 - Present

1. Copy Trading Automation System

- Developed automated trading system for order execution and strategy management from master trading account (Dhan Broker) to multiple client accounts such as Zerodha-Kite, Arihant, Jainam, Indira-Greeksoft, Angelone Broker etc.
- Integrated real-time market data and implemented logic for options trading strategies.
- Reduced manual trading effort by automating Entry/Exit logic and risk management.
- Implemented real-time data streaming to fetch positions & orders data from master account.
- Built a responsive UI in Streamlit framework with performance monitoring, log tracking, and configuration management.

2. Stocks Strategy Project

- Developed using the Streamlit Web Framework.
- Created a strategy to identify potential stocks and indices for selling opportunities among 180 F&O stocks.
- Utilized technical indicators such as Supertrend, MACD, RSI, and PSAR to maximize profit in a daily timeframe.
- Built a tool called Stock-Trend to assist in making informed trading decisions.

3. Algoptions Website Development

- Ongoing project using the Django Framework.
- Continuously working on developing and enhancing features using HTML, CSS, JavaScript, and MySQL.
- Implementing front-end and back-end components for dynamic, database-driven functionality.
- Developed and implemented logic for trading in Options (FNO) markets, including: Placing positions, retrieving funds, monitoring open positions, and fetching order details.

- Built a dynamic and interactive streaming web-page using the Streamlit framework to display real-time trading data and insights.
- Enhanced the system's functionality to support seamless trading operations and efficient data visualization.

4. User Interface Development with Tkinter

- Designed and implemented GUI applications.
- Developed multiple user interfaces using the Tkinter GUI Toolkit.
- Integrated these interfaces with MySQL databases to enable seamless data interaction and management.

5. Web Scraping Project

- Developed using the Streamlit Web Framework.
- Built a web scraping application for gathering and processing data from websites.
- Leveraged the Streamlit framework to create an interactive and user-friendly interface for data presentation.

VKAPS IT Solutions Pvt. Ltd - Indore, MP
Junior Software Engineer

Oct 2021–Mar 2023

- Worked as a Python/Django developer.
- Created core Python scripts for web scraping.
- Developed Django web applications for web scraping and blogging.
- Worked on object detection in real time and music station projects.
- Conducted web scraping with BeautifulSoup and Selenium for platforms like Amazon, Flipkart, Select Fashion UK, Serco, and Hikrupet.
- Developed sample projects in Django, including Blog App, Music App, E-Commerce App, and Web Scraping App.

Other Projects ::

Player Auction Strategy Simulation (<https://sim.jaipuria.ac.in/>)

- Developed a dynamic web application using Django framework, focused on delivering interactive learning simulation and educational content for users.
- Design and developed an interactive Player Auction Strategy Simulation inspired by IPL auctions, enabling users to analyze player performance and make strategic bidding decisions.
- Implemented data-driven features using Django backend, allowing participants to evaluate players based on the statistics, compare skill sets, and optimize team composition.
- Built modules for real-time auction simulation, where users manage budgets, place bids, and dynamically adjust strategies based on competitor behavior.
- Integrated data visualization and analytical logic to help users interpret player metrics, improving decision-making through insights and performance comparisons.
- Enhanced user engagement by simulating real-world scenarios, promoting strategies thinking, teamwork, and analytical skills in a competitive environment.

Kotak-Neo Trading System (Personal Project)

- Developed a web-based automated trading platform using Django and Kotak-Neo Trade APIs for seamless order execution and trade management.
- Implemented user-based trading controls for BUY/SELL operations in Index Options trading.
- Built modules to display and manage :: Open Positions, Order Book, Executed Orders, Trade History
- Designed database functionality to store daily executed trades and order records for tracking and reporting purposes.
- Developed position management features, including manual square-off functionality for active positions.
- Integrated real-time API communication for order placement, execution tracking, and portfolio updates.
- Deployed the complete trading system on Amazon Web Services server infrastructure.
- Worked on backend API integration, database management, deployment, and end-to-end trading workflow automation.
- Successfully tested live trading workflows by accessing the deployed application through public IPv4 address on mobile devices.

Education & Certification:

B. Tech in Mechanical Engineering

Synergy Institute of Engineering, Dewas, MP

2019 - 2022

Certification in Python

Ethans Tech Kharadi, Pune, MH

Dec 2020-Jan 2021

Certification in Data-Science

Ethans Tech Kharadi, Pune, MH

Feb 2021-Mar 2021

Certification of Django

CodeBetter, Indore, MP

Mar 2021-Apr 2021

Post Diploma (Tool & Die Mfg.)

Indo-German Tool Room, Aurangabad, MH (AICTE Delhi)

2016-2017

Advance Diploma (Tool & Die Making)

Indo-German Tool Room, Indore, MP (AICTE Delhi & RGTU, Bhopal)

2010-2014
